TITLE	Students Exiting School, 1993-94. Programs for Exceptional Students Data Report, Series 97-12.
INSTITUTION	Florida State Dept. of Education, Tallahassee. Div. of Public Schools.
PUB DATE	Oct 96
NOTE	325p.
AVAILABLE FROM	Florida Department of Education, Division of Public Schools, Bureau of Student Services and Exceptional Education, Florida Education Center, Suite 622, Tallahassee, FL 32399-0400; telephone: 904-488-1879; fax: 904-487-2679.
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF01/PC13 Plus Postage.
DESCRIPTORS	Age; Data Collection; *Disabilities; *Dropout Rate; Elementary Secondary Education; *Gifted; *Graduation; Needs Assessment; School Demography; School Districts; State Surveys; Student Attrition; *Student Characteristics; Tables (Data); *Withdrawal (Education)
IDENTIFIERS	*Florida

ABSTRACT

This document presents narrative data, tables, and graphs on exceptional education students who exited school in Florida during the 1993-94 school year. The first section provides background information and describes the types of exit data collected from school districts and agency programs. Definitions of terms are also provided. The next three sections contain information on the reasons students exited, the age at which they exited, and their anticipated needs. In each of these sections, statewide numbers and percents are presented for each primary exceptionality. The fifth section contains national graduation data by state and by program. Extensive appendices present information such as lists of withdrawal and exceptionality codes. District level data include the following: the number of Florida student non-completers identified as disabled by reason and primary exceptionality; total student exiters identified as disabled by exit reason and primary exceptionality; number of Florida student completers identified as gifted by option and district; number of Florida student exiters with anticipated needs, identified as disabled and categorized by primary exceptionality; and number and percent of U.S. students age 14 and older exiting the educational system by exit category, state, and exceptionality, in 1991-92. Preface

The Florida Department of Education, Division of Public Schools, Bureau of Student Services and Exceptional Education has developed this data report to provide information about exceptional student education programs in Florida. This report is intended to be used in planning, evaluation, and research efforts by district and agency personnel serving students with exceptionalities and by others working in this area.

Questions about this data report should be addressed to the Data and Research Section, Bureau of Student Services and Exceptional Education, Florida Department of Education, 614 Florida Education Center, Tallahassee, Florida 32399-0400, telephone 904/488-1379, Suncom 278-1379.

Introduction

This document is divided into five sections. The first section, Background Information, describes the type of exit data collected from school districts and agency programs during the 1993-94 school year that is included in this publication. In addition, this section provides definitions of terms.

The next three sections contain information regarding exceptional education students exiting school in the State of Florida. This includes data on the reasons students exited, the age at which they exited, and the anticipated needs of the student exiters. In each of these sections, statewide numbers and percents are presented for each primary exceptionality, while district level data are contained in appendices.

NOTE: Due to an error in reporting, Collier County exit data was not available for this publication.

The fifth section contains national graduation data by state and by program. The information is provided for the 50 states, District of Columbia, Puerto Rico, and the U.S. territories and possessions.

Background Information

Data Sources

Exceptional student exit data are taken from the Division of Public Schools' data publications entitled *Programs for Exceptional Students: Federal Annual Data Report Summary* for the years 1989-90 through 1991-92 and from the Department of Education Student Data Base reports for the succeeding years. These data were reported by districts in 1989-90 on required reporting forms and, in 1990-91 through 1993-94, through the Department of Education (DOE) Automated Student Data Base. Student exit data are collected annually following the close of the school year and include data on each student, age 14 and above, who has been in an exceptional education program at any time during the school year.

Definitions of Terms

Exit Categories

For data derived from the DOE Student Data Base, the PK-12 Withdrawal Codes are used to indicate the type of diploma or certificate received by a student, those students who reached the maximum age for school services, and students who dropped out of school or whose whereabouts are unknown. These withdrawal codes are listed in Appendix A. The categories used in this report are defined below. Students who exited to regular education because they no longer needed special education are not included.

<u>Completers</u>

Standard Diploma: Student received a standard high school diploma.

Special Diploma: Student received a special high school diploma designed for exceptional education students in accordance with the requirements contained in the district's pupil progression plan.

Certificate of Completion: Student exited the educational program through receipt of a certificate of completion.

Special Certificate of Completion: Student exited the educational program through receipt of a special certificate of completion designed for exceptional education students in accordance with requirements contained in the district's pupil progression plan.

GED in Dropout Prevention: Student in a Dropout Prevention Program exited the educational program through receipt of a diploma based on successful completion of the GED Test.

Non-Completers

Maximum Age: Student was withdrawn from school because exceptional student education programs were unavailable due to student's age.

Did Not Enter: Student was expected to attend school but did not enter as expected for unknown reasons.

Other Dropout: Student dropped out of school before earning a diploma or certificate of completion and before reaching maximum age. These students are at least 14 years of age. The withdrawal codes reported for these students are indicated in Appendix A.

Court Action: Student exited the educational program due to court action.

Anticipated Services

The anticipated services listed below are possible services a student identified as disabled age 14 years or older may require upon exiting the school system to successfully transition from school to the community and work. These services are reported annually following the close of the school year for each student exiter, age 14 and above, who has been in an exceptional education program at any time during the school year.

Counseling and Guidance: This includes personal adjustment counseling, counseling needed to maintain a counseling relationship throughout an individual with disabilities' program of services, and referral necessary to help individuals with disabilities secure needed services from other agencies.

Evaluation of Vocational Rehabilitation Potential: This includes diagnostic and related services incidental to the determination of eligibility for vocational rehabilitation, and the nature and scope of services to be provided.

Physical and Mental Restoration Services: This includes services necessary to correct or substantially modify a physical or mental condition which is stable or slowly progressive.

Vocational and Other Training Services: This includes services which address personal and vocational adjustment, books, tools, and other training materials.

Transitional Employment Services: This includes intensive, on-site placement and training through the use of job coaches or other special training to assist persons with severe disabilities to become employed.

Placement: This refers to placement in suitable employment.

Post-Employment Services: This includes any services necessary to maintain suitable employment, including ongoing support services necessary to maintain persons with severe disabilities in employment.

Maintenance: This covers basic living expenses for individuals identified as disabled such as food, shelter, clothing, and other subsistence expenses which are necessary to support and derive the full benefit of these services. Maintenance also includes support or income maintenance programs or welfare.

Transportation: This includes necessary travel and related expenses including subsistence during travel in connection with transporting individuals with disabilities and their attendants for the purpose of supporting and deriving the full benefit of other services being provided.

Family Services: This includes services to members of the family of an individual with disabilities when necessary to the rehabilitation of the individual.

Independent Living Services: This includes those services that will assist individuals with disabilities to perform daily living activities.

Residential Living Services: This includes services necessary to maintain individuals in residential facilities.

Interpreter Services: Interpreter and notetaking services for the deaf, including tactile interpreting for individuals identified as dual-sensory impaired.

Reader Services: Reader services, rehabilitation teaching services, notetaking services and orientation and mobility services for individuals identified as visually impaired.

Technological Aids: This includes telecommunications, sensory, and other technological aids and devices.

Other Goods and Services: This refers to any other goods and services which can reasonably be expected to benefit an individual with disabilities.

Other Terms

Primary Exceptionality: This code indicates the exceptionality for which the student spends the most time in exceptional education classes. There were sixteen primary exceptionality areas in 1993-94 derived from the Exceptionality, Primary element in the Department of Education Student Data Base. A complete listing of the primary exceptionality codes is contained in Appendix B.

The following acronyms are used throughout this publication to designate exceptional student education program areas:

Acronym	Exceptional Student Education Program Area
DSI	Dual-Sensory Impaired
EH	Emotionally Handicapped
EMH	Educable Mentally Handicapped
HI/Deaf	Hearing Impaired/Deaf
H/H	Hospital/Homebound
LI	Language Impaired
PI	Physically Impaired
PT/OT	Physical Therapy/Occupational Therapy
PMH	Profoundly Mentally Handicapped
SED	Severely Emotionally Disturbed
SI	Speech Impaired
SLD	Specific Learning Disabled
TMH	Trainable Mentally Handicapped
TBI	Traumatic Brain Injury
VI	Visually Impaired

Reasons Students Exit

District Totals

The number and percent of students in each primary exceptionality area exiting in 1993-94 as completers (receiving a standard or special diploma, certificate of completion or special certificate of completion, or graduate equivalency degree-GED in Dropout Prevention), or as Non-Completers (those reaching maximum age, not continuing education, withdrawn due to court action and other dropout reasons) are presented in Tables 1a and 1b. Table 1c includes these completers and non-completers as well as students exiting to continuing education or adult education and those who were deceased. The tables include data on students age 14 and above from the 67 school districts in Florida.

Of the 5,682 student completers with disabilities who exited Florida schools, 3,711 or 65 percent received a standard diploma, 1,633 or 29 percent received a special diploma and 297 or five percent received either a certificate of completion or special certificate of completion. Finally, 41 students or one percent received a GED in a Dropout Prevention program.

When the 2,745 students completers identified as gifted are added to the numbers of students with disabilities, 77 percent of the completers received standard diplomas, 19 percent received special diplomas, and three percent received either a certificate of completion or special certificate of completion.

Of the 4,118 non-completers, 20 percent of students with disabilities exited and are not know to be continuing their education (DNE), five percent were withdrawn due to court action (W13) and the majority, 75 percent of student non-completers, dropped out for other reasons. These other reasons include the withdrawal codes: W05, W11, W14, W15, W16, W17, W18, W19, W20, W21, W22, and W23. See appendix A for a description of these withdrawal codes.

Table 1c provides information on total student exiters for the 1993-94 school year and includes students who exited and are continuing their education (W03, W04, W24, and W26,) students who exited to adult education and students who were deceased. The percent of all student exiters with exceptionalities who were completers was 39 percent, followed by those who exited and are continuing their education 33 percent, non-completers 20 percent, students who exited to adult education nine percent, and those who were deceased, less than one percent.

See Appendices C through H for district level data on students by exceptionality and exit reason.

Agency Totals

There were 57 student completers from the Florida School for the Deaf and the Blind in 1993-94. Eighteen (32 percent) of these students received a standard diploma, 39 (67 percent) received a special diploma and one student exited to continuing education.

Longitudinal Trends

Figure 1 and Table 2 show the exit reasons for students with exceptionalities over the five-year period from 1989-90 to 1993-94. The data are displayed depicting both completers and non-completers in all five years. The majority of student completers (between 66 and 80 percent) received a standard diploma. The percent of student completers receiving special diplomas ranged from 17 to 29 percent. Over the five-year period, 75 percent of student completers with exceptionalities received a standard diploma and 21 percent received a special diploma.

Non-completers accounted for between 29 and 37 percent of the student completers and non-completers with exceptionalities over the five-year period. The lowest percentage occurred in the 1991-92 school year and the highest during the 1990-91 school year. Over the five-year period, 34 percent of students with exceptionalities were non-completers.

Figure 2 and Table 3 present the same data excluding students identified as gifted. In 1989-90, 51 percent of the students with disabilities received a standard diploma and 40 percent received a special diploma. The percent of students with disabilities receiving standard diplomas increased to 73 percent in 1990-91, then decreased in each of the years 1991-92 and 1992-93, before increasing again in 1993-94 to 65 percent. For the five year period, 64 percent of the students with disabilities received standard diplomas.

The number of students with disabilities receiving special diplomas has fluctuated over the five year period from a high of 40 percent in 1989-90 to a low of 23 percent in 1990-91. In 1993-94, 29 percent of the students with disabilities received special diplomas. Over the five-year period, 30 percent of the students with disabilities received a special diploma.

Between four and nine percent of the students with disabilities completing school between 1989-90 and 1993-94 received either a certificate of completion, or a special certificate of completion. Over the five-year period, five percent of students with disabilities received either a certificate of completion or a special certificate of completion.

Between 35 and 44 percent of the students with disabilities were non-completers over the period from 1989-90 to 1993-94, with the high occurring in 1990-91 and the low occurring in 1991-92. In 1993-94, 42 percent of the students with disabilities were non-completers. Forty-one percent of the student exiters with disabilities were non-completers between 1989-90 and 1993-94.

Exceptionality Data

The rest of this section consists of brief summaries of exit data for each primary exceptionality, along with a look at the same data over the five-year period from 1988-89 to 1992-93. This permits the reader to see trends in exit reasons for each exceptionality category over the five-year period.

District level data on exit reasons for students with disabilities can be found in Appendices C and D and data on students identified as gifted in Appendices F and G.

Educable Mentally Handicapped

In 1993-94, 77 percent of the student completers identified as educable mentally handicapped earned a special diploma, 20 percent received a standard diploma, two percent received a special certificate of completion, and less than one percent a certificate of completion.

Table 4 and Figure 3 display the exit data for the five-year period from 1989-90 to 1993-94. Over the five-year period, between 93 and 98 percent of the students identified as educable mentally handicapped received either a standard or special diploma with a five-year rate of 97 percent. The non-completer rate has fluctuated between 30 and 39 percent with an overall rate of 36 percent. In each year of the period, less than seven percent of students identified as educable mentally handicapped received either a certificate of completion or special certificate of completion.

Educable Mentally Handicapped
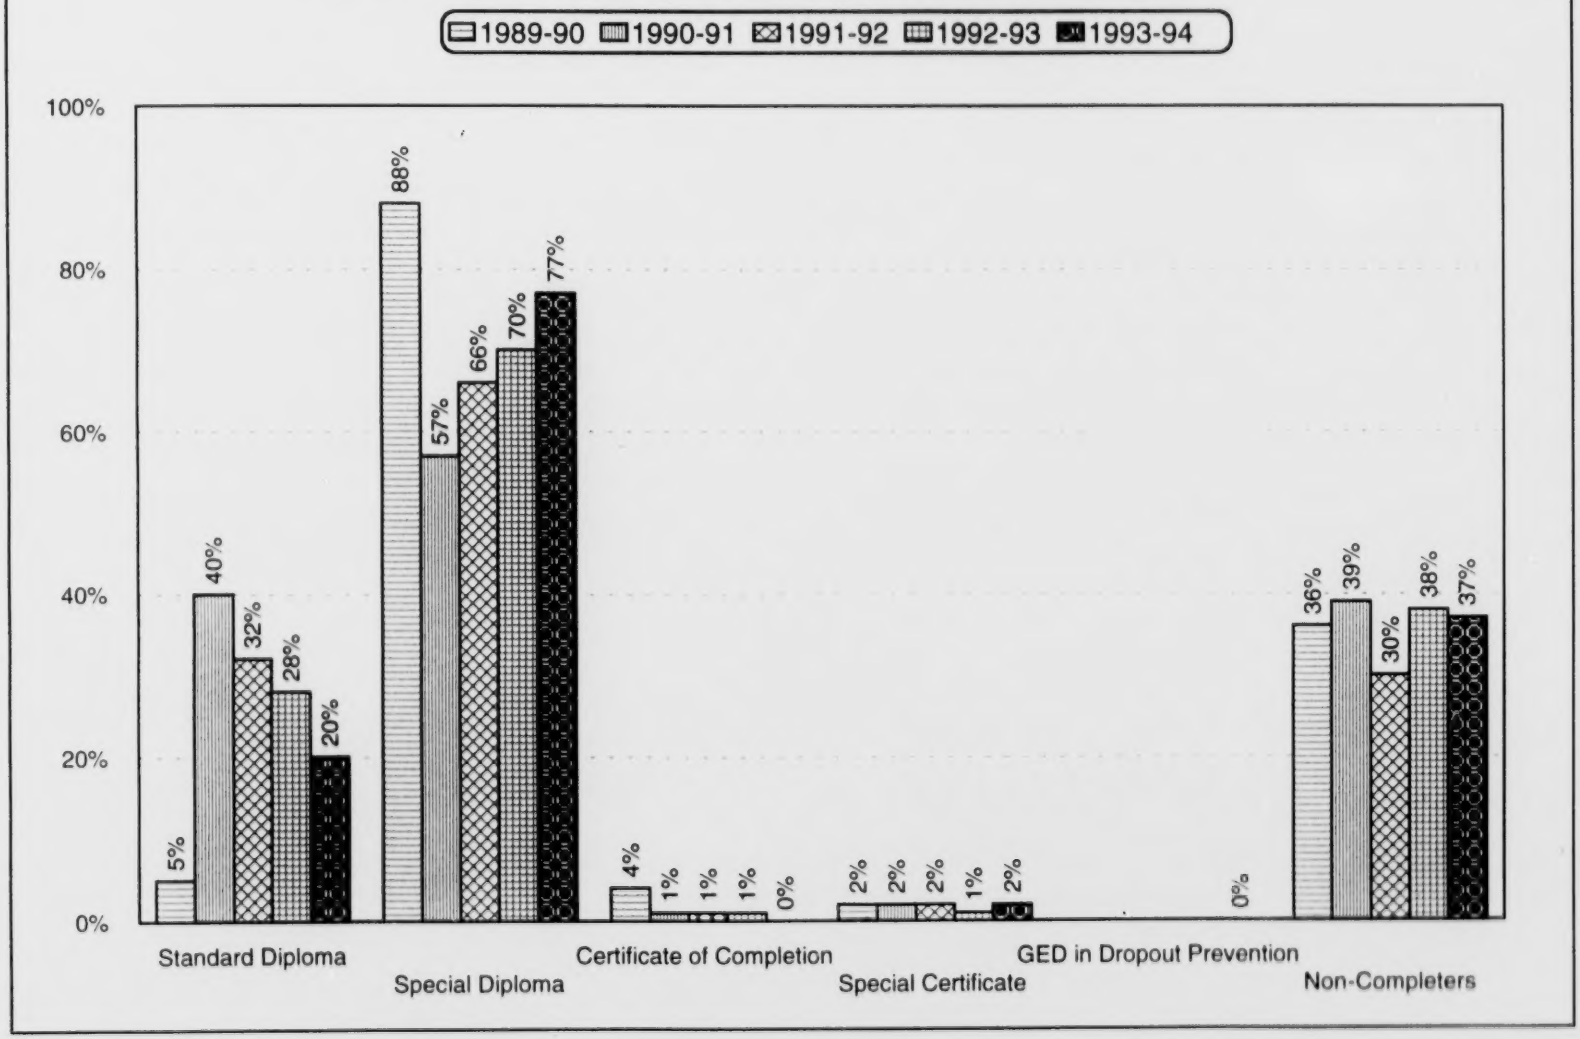
Statewide Longitudinal Study of Exit Reasons



Trainable Mentally Handicapped

In 1993-94, it was reported that 57 percent of the student completers identified as trainable mentally handicapped received a special diploma, seventeen percent received a standard diploma, 22 percent a special certificate of completion, and four percent received a certificate of completion.

As shown in Table 5 and Figure 4, from 1989-90 through 1993-94, between 47 and 64 percent of the student completers identified as trainable mentally handicapped received a special diploma with a five-year rate of 52 percent. For students receiving certificates of completion or special certificates of completion, the range is from three to 12 percent and from 13 to 28 percent respectively. No clear trend appears to be indicated by the data. The rate of student non-completers identified as trainable mentally handicapped fluctuated between seven and 15 percent, with a rate of 12 percent in 1993-94. The rate for the five year period is also 12 percent.

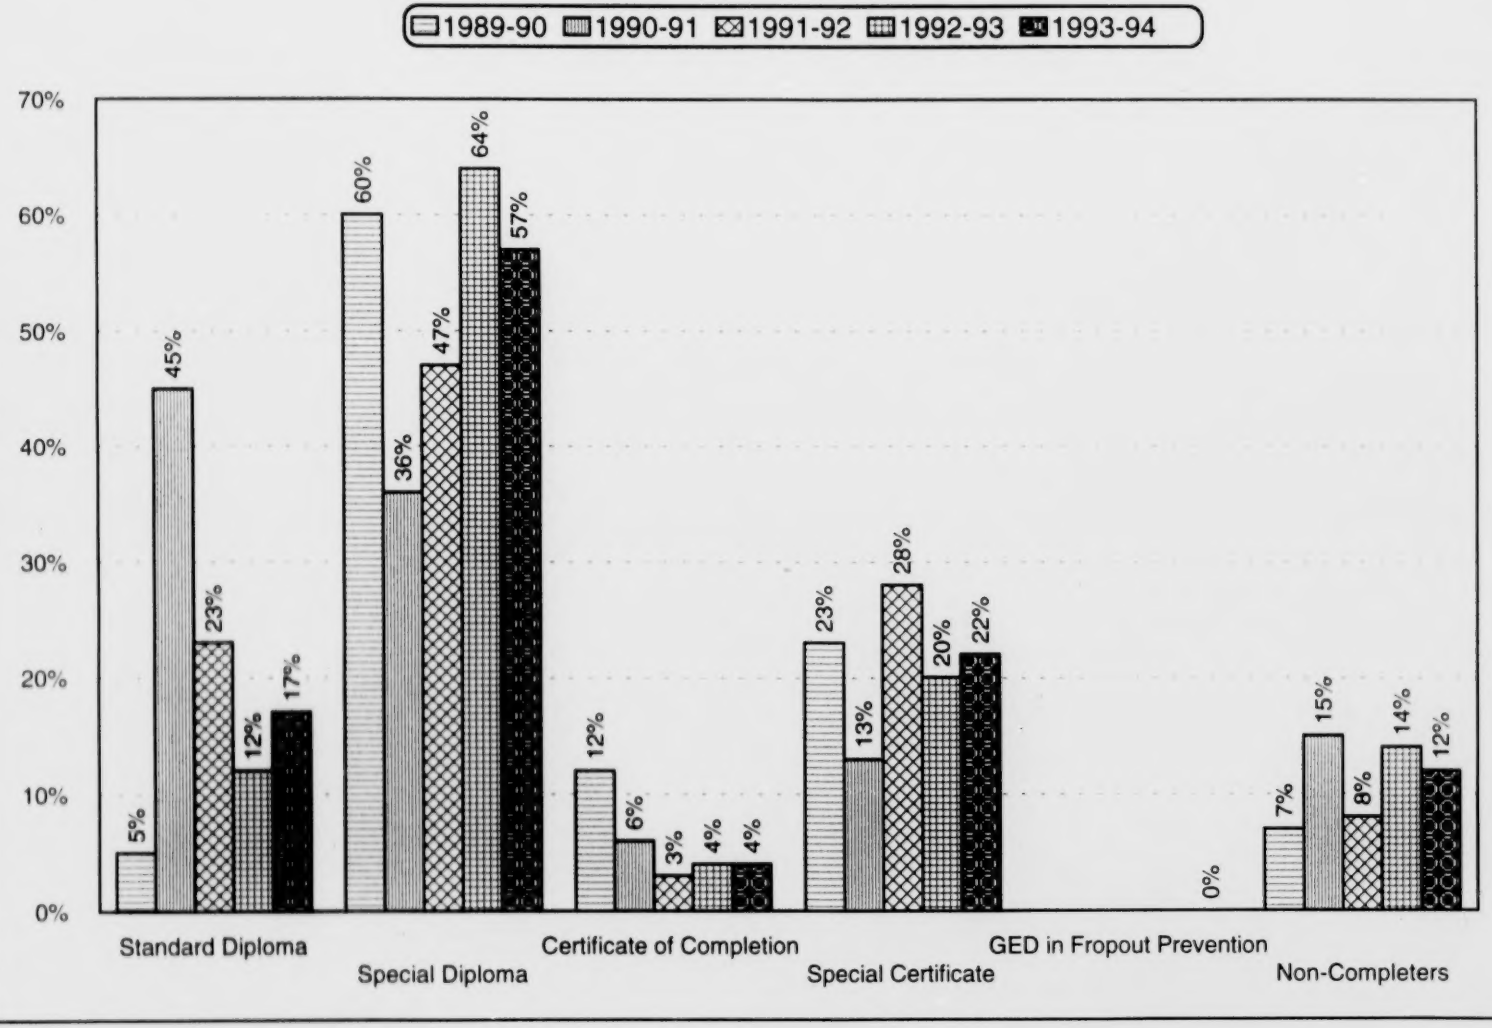
Figure 4
Trainable Mentally Handicapped
Statewide Longitudinal Study of Exit Reasons



Physically Impaired

The most common exit reasons for student completers identified as physically impaired in 1993-94 were standard diplomas (68 percent) and special diplomas (26 percent). These were followed by special certificates of completion (three percent) and certificates of completion (two percent). The rate of student non-completers was 20 percent in 1993-94.

As shown in Table 6 and Figure 5, during each year of the five-year period, over 90 percent of student completers identified as physically impaired exited school with either a standard or special diploma. The rate of student non-completers identified as physically impaired fluctuated between eight percent (1989-90) and 22 percent (1992-93). The five-year non-completer rate was 16 percent. Fewer than ten students in any year received a certificate of completion or special certificate of completion.

Speech Impaired

Ninety-six percent of the 138 student completers identified as speech impaired exited school with a standard diploma in 1993-94. Forty-three percent of the students were non-completers and three percent received a special diploma.

State exit data (Table 7 and Figure 6) over the five-year period show a majority of student completers identified as speech impaired received either a standard or special diploma. The five year average for these combined is 98 percent. Over the five-year period, between zero and six percent of these students received a certificate of completion. For the five year period 1989-90 through 1993-94, 39 percent of the students identified as speech impaired were non-completers.

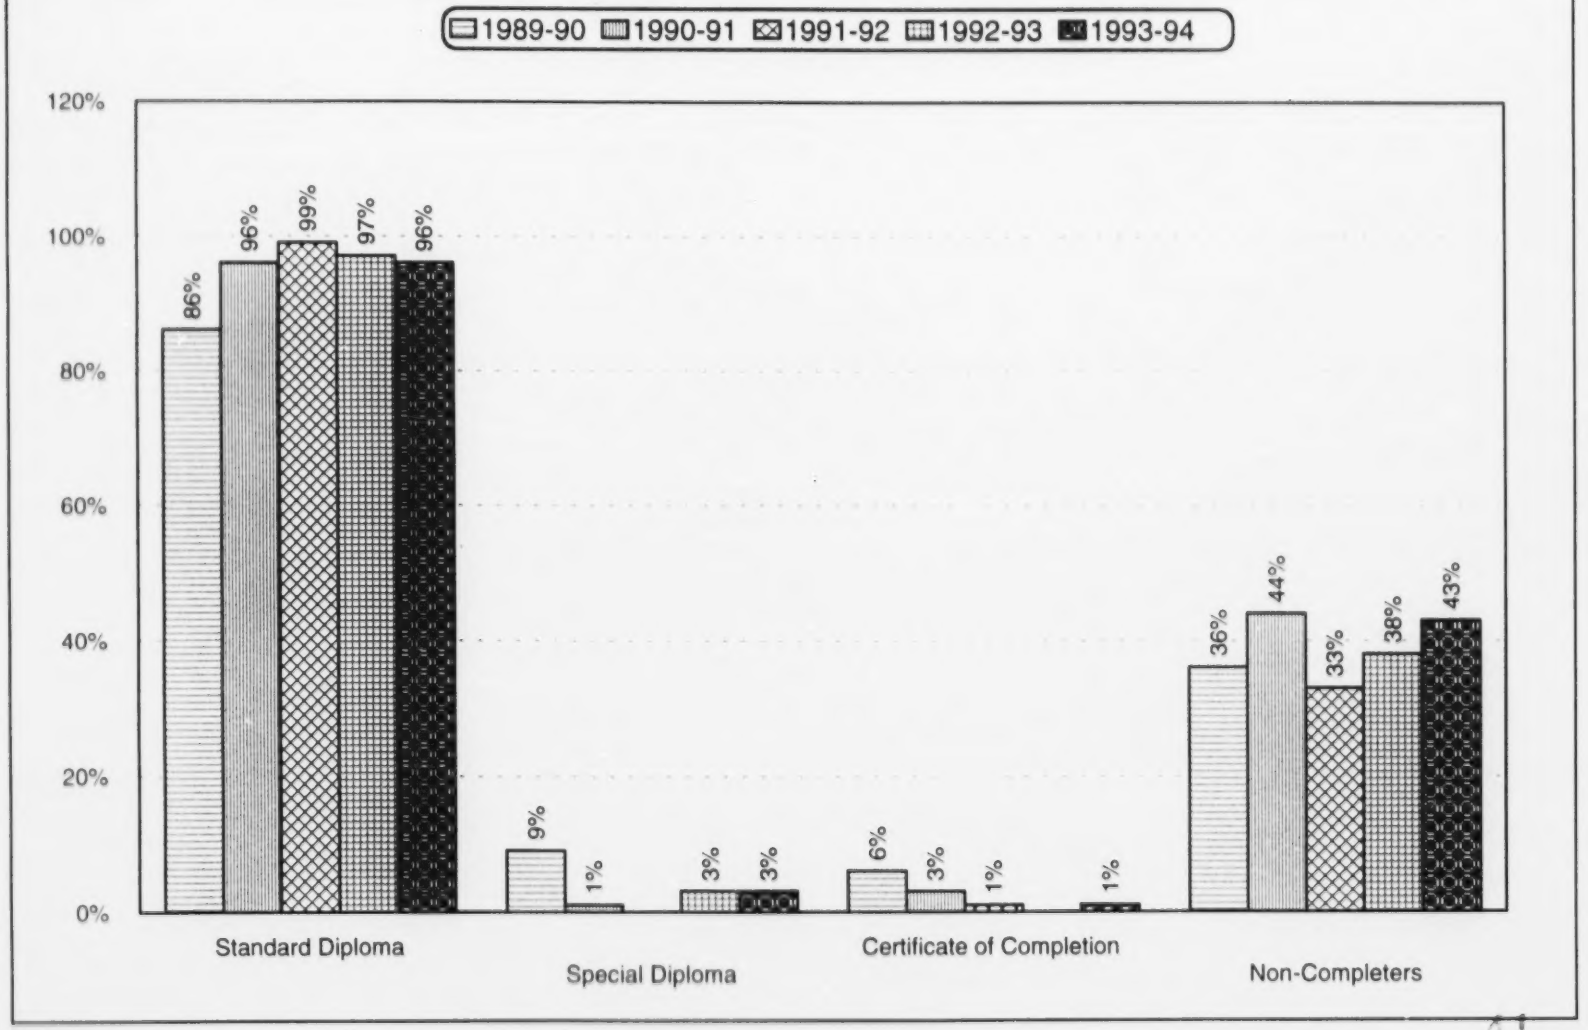
Statewide Longitudinal Study of Exit Reasons



Hearing Impaired/Deaf

In 1993-94, one hundred percent of the student completers identified as hearing impaired or deaf exited school with either a standard or special diploma. Ten percent of the student exiters identified as hearing impaired or deaf were non-completers.

Table 8 and Figure 7 display the exit data from 1989-90 through 1993-94. These data reveal an overall increase in the percentage of standard and special diplomas awarded to students identified as hearing impaired and deaf, from 96 percent in 1989-90 to 100 percent in 1993-94. During the same period, the percentage of students receiving a certificate of completion or special certificate of completion decreased from four percent to zero. The percentage of student non-completers fluctuated from 18 percent in 1990-91 to 10 percent in 1993-94 with a five-year rate of 14 percent.

Language Impaired

Of the 68 student completers identified as language impaired in 1993-94, 87 percent received a standard diploma, seven percent received a special diploma, and four percent received a certificate of completion or special certificate of completion.

As seen in Table 9 and Figure 8, the percentage of students identified as language impaired exiting school as non-completers has increased over the five-year period, from 33 percent in 1989-90 to 57 percent in 1993-94. At the same time, the number of student completers receiving a standard diploma has fluctuated from a low of 58 percent in 1989-90 to a high of 96 percent in 1991-92. The overall rate for the five year period is 83 percent. Fewer than four students in any given year have received a certificate of completion or special certificate of completion.

Visually Impaired

Eighty-eight percent of the 49 student completers identified as visually impaired received standard diplomas, eight percent received a special diploma, and four percent received a certificate of completion or special certificate in 1993-94. Eight percent of the students identified as visually impaired were non-completers in 1993-94.

Table 10 and Figure 9 show that the number of student completers identified as visually impaired receiving standard diplomas has fluctuated over the five year period from a low of 88 percent in 1993-94 to a high of 94 percent in 1989-90 and again in 1992-93. The five year average for standard diplomas is 91 percent. After a high of 20 percent in 1990-91, non-completers decreased to eight percent in 1993-94. No more than six percent of students identified as visually impaired in any given year received a certificate of completion, or special certificate of completion.

Emotionally Handicapped

In 1993-94, 71 percent of the student completers identified as emotionally handicapped received a standard diploma. This was followed by 25 percent receiving a special diploma, two percent receiving a GED in DOP, and one percent receiving a certificate of completion or special certificate of completion. Sixty-three percent of the students identified as emotionally handicapped were non-completers during the 1993-94 school year.

As shown in Table 11 and Figure 10, the percentage of student completers identified as emotionally handicapped receiving standard diplomas has increased over the five year period from 59 percent in 1989-90 to 71 percent in 1993-94. The percentage of completers receiving special diplomas has declined from 39 percent in 1989-90 to 25 percent in 1993-94. The percent of student non-completers identified as emotionally handicapped has remained fairly consistent for the five year period ranging from 61 to 66 percent with a five year average of 64 percent.

Specific Learning Disabilities

In 1993-94, 78 percent of the student completers identified as specific learning disabled received standard diplomas, 19 percent received a special diploma, and one percent received a certificate of completion, special certificate of completion or a GED in DOP.

From 1989-90 to 1993-94, the percentage of student completers identified as learning disabled who received a standard diploma increased from 69 percent to 78 percent (Table 12 and Figure 11). Conversely, the percentage receiving special diplomas declined form 27 percent to 19 percent. The percentage of student non-completers ranged from 35 percent to 43 percent, with a five year average of 41 percent. Between one and three percent of student exiters identified as specific learning disabled received a certificate of completion and between zero and one percent received a special certificate of completion.

Profoundly Mentally Handicapped

There were 103 student completers identified as profoundly mentally handicapped in 1993-94. Fifty-three percent of these students received a special certificate of completion, nineteen percent received a special diploma, 16 percent were reported as receiving a standard diploma, and 12 percent receiving a certificate of completion. Fourteen percent of the students identified as profoundly mentally handicapped were non-completers.

Table 13 and Figure 12 present the exit data for students identified as profoundly mentally handicapped from 1989-90 through 1993-94. These data reveal a five year diploma rate (standard and special) of 40 percent, for student completers over the five years. For the total students, the five year average for student non-completers was 18 percent.

Dual-Sensory Impaired

There were two student completers identified as dual-sensory impaired in 1993-94. One student received a special diploma and one a special certificate of completion.

Five years of completer data for students identified as dual-sensory impaired is presented in Table 14. For the five-year period from 1989-90 through 1993-94, 10 completers received a special certificate of completion, three exiters received a standard diploma, four received a special diploma, and one received a certificate of completion. Also, over the five year period, two students were non-completers.

Autistic

Of the 24 student completers identified as autistic in 1993-94, 33 percent received standard diplomas, 42 percent special diplomas 21 percent a special certificate of completion, and four percent a certificate of completion. The percent of student non-completers was 14 percent in 1993-94.

Table 15 and Figure 13 present the exit data for students identified as autistic from 1989-90 through 1993-94. The five-year rate for standard diplomas was 42 percent, followed by 28 percent receiving special diplomas, 24 percent a special certificate of completion, and six percent receiving a certificate of completion. The five year rate for student non-completers was 15 percent.

Severely Emotionally Disturbed

In 1993-94, 45 percent of the student completers identified as severely emotionally disturbed received standard diplomas, 47 percent received a special diploma, two percent received a certificate of completion and one percent a special certificate. The percent of student non-completers identified as severely emotionally disturbed in 1993-94 was 69 percent.

Table 16 and Figure 14 show the five-year period from 1989-90 to 1993-94. For student completers identified as severely emotionally disturbed the five year average for students receiving standard diplomas was 52 percent and for special diplomas 42 percent. In any given year, less than three percent received a certificate of completion, and between one and six percent a special certificate of completion. The five year average for student non-completers identified as severely emotionally disturbed was 69 percent.

Hospital/Homebound

Ninety-four percent of the 368 student completers identified as hospital/homebound received a standard diploma in 1993-94, three percent received a certificate of completion, two percent a GED in DOP and less than one percent a special certificate of completion. The percent of student non-completers identified as hospital/homebound in 1993-94 was 37 percent.

Exit data from 1989-90 through 1993-94 is displayed in Table 17 and Figure 15. The five year average for student completers identified as Hospital/Homebound receiving a standard diploma was 97 percent. No more than four percent of the student completers received a special diploma, certificate of completion or special certificate of completion in any for the five years. For total students, completers/non-completers, the five year average for student non-completers was 36 percent.

Gifted

One hundred percent of the student completers identified as gifted in 1993-94 received a standard diploma. Six percent of the students identified as gifted were non-completers and 0.3 percent of the completers received a GED in drop out prevention.

From 1989-90 through 1993-94, nearly 100 percent of the student completers identified as gifted have exited school receiving a standard diploma (Table 18 and Figure 16). The percentage of student non-completers has fluctuated between three and six percent over the period from 1989-90 through 1993-94, with an average for all years of five percent.

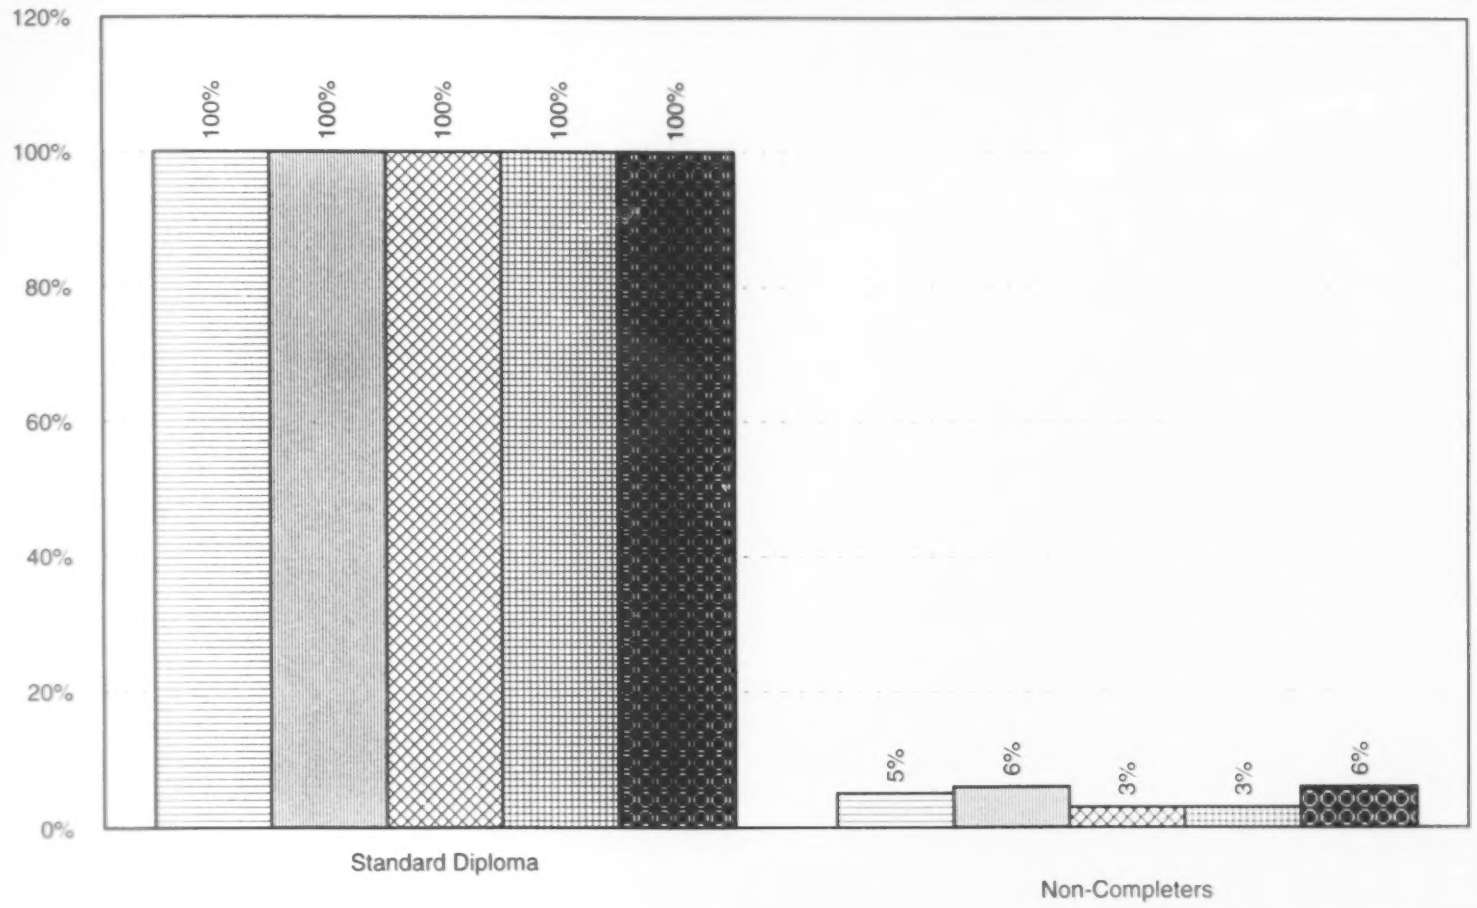
Figure 16
Gifted
Statewide Longitudinal Study of Exit Reasons



Student Exiters by Age

In the previous section, data on the reasons 1993-94 students identified as exceptional exited school were presented. In this section, data are presented for the same students by their age at the time they exited. Table 19 shows the number and percent of students in each primary exceptionality category who exited school by age for students 14 and above.

Students ages 14 and 15 are included in these data due to federal data reporting requirements. Each year since 1984-85 the United States Department of Education, Office of Special Education Programs (OSEP) has collected data from States on the number of students with disabilities age 14 and older exiting the educational system. Florida school law requires that all children between the ages of 6 and 16 attend school. Students ages 14 and 15 in Table 19 include those who are habitually truant and any who have received a certificate of exemption from the compulsory attendance rule.

According to the data, 1993-94 students with exceptionalities were most likely to exit school at age 18. Thirty-six percent of all the 1993-94 student exiters with exceptionalities were 18 years of age when they exited school. This was followed by 23 percent exiting at 17 years of age and 17 percent exiting at age 19. Ten percent of the exiters were 16 years of age, five percent age 20, four percent age 15, three percent age 21, two percent age 14, and one percent above the age of 21.

When gifted students are excluded from the data, the percentage of 18-year old student exiters decreases from 36 percent to 32 percent. Twenty-two percent of the student exiters with disabilities exited at 19 years of age, 17 percent at age 17, and 12 percent at age 16. Six percent exited at age 20, four percent at age 15, four percent at age 21, two percent at age 14, and less than one percent above the age of 21.

Appendix I presents district-level data on the number of students exiting by age for each primary exceptionality (excluding gifted) and district totals for all students identified as disabled. Appendix J provides the same information for students identified as gifted.

Anticipated Needs of Student Exiters

Table 20 presents data on the anticipated needs of 1993-94 exiting students with disabilities by primary exceptionality. Each year school districts are required to report the services that are anticipated to be needed by each student exiter identified as disabled regardless of whether those services will or will not be provided. Student exiters for whom several types of services are anticipated (e.g. evaluation, transportation, technological aids, etc.) are reported in more than one category of service. Because services may be anticipated in more than one category, the numbers reported in Table 20 do not add up to the total number exiting and the percentages do not add up to 100 percent.

The services most frequently reported as anticipated needs for 1993-94 student exiters were vocational and other training services (22 percent), counseling and guidance (19 percent), evaluation of vocational rehabilitation potential (18 percent), vocational placement (14 percent), post-employment services (11 percent), and transitional employment services (nine percent). Other services reported in descending order were maintenance (5.0 percent), transportation (4.3 percent); independent living services and family services (2.9 percent each); physical and mental restoration (2.1 percent); residential living services (1.8 percent); and interpreters, readers, and technological aids (less than one percent each). Districts reported anticipated needs of "other" goods and services for 7.3 percent of the exiters. Districts also reported that 17.6 percent of the student exiters identified as disabled required no special services upon exiting the school system.

District level data on the anticipated needs of all 1993-94 student exiters with disabilities is contained in Appendix K followed by the same data for each primary exceptionality (excluding gifted). Of note is that 30 of the 67 Florida school districts submitted no data regarding the anticipated needs of their student exiters identified as disabled.

National Exit Data

1991-92 exit data for all student exiters identified as disabled which were submitted to the U.S. Department of Education by all 50 states and United States territories are contained in Table 21. In this table, the data are broken out by age and by categories defined by the U.S. Department of Education, Office of Special Education Programs (OSEP). In OSEP's Sixteenth Annual Report to Congress, students listed in the category of "graduated with diploma" included only those students who received a standard diploma. Students who graduated with a special diploma, certificate of completion, or special certificate of completion were reported as "graduating with a certificate". The "other basis of exit" category contains students with disabilities who exited school with their status unknown. OSEP cautions readers that this category varies a great deal from state to state and that for many states students who returned to regular education are incorrectly included in these figures.

According to the data in Table 21, 44 percent of the U.S. students with disabilities graduated with a regular diploma. Forty-five percent of the 100,742 students with disabilities who graduated with a diploma were 18 years of age. This was followed by 29 percent at age 19, 14 percent at age 17, seven percent at age 20, three percent at age 21 and one percent at both age 16 and over the age of 21. Less than one percent of the students with disabilities who graduated with a diploma were either age 14 or 15 at the time of exit.

Students who graduated with a certificate made up 13 percent of the exiters and were, on average, slightly older than those who graduated with a diploma. Ninety-two percent of the students who graduated with a certificate were 18 or older, compared with 85 percent of students graduating with a diploma.

Only two percent of the exiters left due to reaching the maximum age for educational services. Ninety-three percent of these 4,337 students were ages 20 and above.

Student exiters who dropped out made up 22 percent of the total exiters and those leaving with an other basis of exit added another 18 percent. Students who dropped out at ages 16, 17, and 18 made up 68 percent of the total dropouts reported in the U.S. Seventy-five percent of those exiting for other reasons were age 17 and below.

A total of 229,368 student exiters age 14 and above were reported by the United States and its territories in 1991-92. Thirty percent of the student exiters with disabilities were age 18 at the time of exit, followed by 20 percent at age 19, and 16 percent at age 17. Nine percent of the exiters were age 16, eight percent age 20, six percent age 15, five percent age 14, five percent age 21, and two percent over the age of 21.

Tables 22 through 31 contain the national exit data for each federal exceptionality category. The categories used by the United States Department of Education, Office of Special Education Programs equate to Florida's primary exceptionality categories as follows:

United States	Florida
Mental Retardation	Educable Mentally Handicapped, Trainable Mentally Handicapped, Profoundly Mentally Handicapped
Orthopedic Impairments	Physically Impaired, Traumatic Brain Injured
Other Health Impairments	Hospital/Homebound
Speech or Language Impaired	Speech Impaired, Language Impaired
Hearing Impairments	Hearing Impaired/Deaf
Visual Impairments	Visually Impaired
Specific Learning Disabilities	Specific Learning Disabilities
Serious Emotional Disturbance	Emotionally Handicapped, Severely Emotionally Disturbed
Deaf-Blindness	Dual-Sensory Impaired
Autism	Autistic
Traumatic Brain Injury	---
Multiple Disabilities	---

Appendix L contains the national exit data for 1991-92 broken out for each of the United States and its territories.

Appendix A

PK-12 WITHDRAWAL CODES

CODE	DEFINITION
*DNE	Any PK-12 student who was expected to attend school but did not enter as expected for unknown reasons.
W01	Any PK-12 student promoted, retained, or transferred to another attendance reporting unit in the same school.
W02	Any PK-12 student promoted, retained, or transferred to another school in the same district.
W03	Any PK-12 student who withdraws to attend another public school, in or out of state.
W04	Any PK-12 student who withdraws to attend a nonpublic school, in or out of state.
*W05	Any student over compulsory attendance age who leaves school voluntarily with no intention of returning.
W06	Any student who graduated from school with a standard diploma.
W07	Any student who graduated from school with a special diploma.
W08	Any student who left school with a certificate of completion.
W09	Any student who left school with a special certificate of completion.
W10	Any PK-12 student in a Dropout Prevention Program who graduated from school with a diploma based on successful completion of the GED test.
*W11	Any PK-12 student withdrawn from school due to hardship.
W12	Any PK-12 student withdrawn from school due to death.
*W13	Any PK-12 student withdrawn from school due to court action.
*W14	Any student who withdraws to enter the military.
*W15	Any PK-12 student who is withdrawn from school due to nonattendance.

*W16	Any student who withdraws from school to get married.
*W17	Any student who withdraws from school due to pregnancy.
*W18	Any student who withdraws from school due to medical reasons.
*W19	Any student who is withdrawn from school because exceptional student education programs are unavailable due to student's age.
*W20	Any student who withdraws from school due to failing the High School Competency Test (HSCT) and does not receive any of the certificates of completion.
*W21	Any student who is withdrawn from the rolls due to being expelled from school.
*W22	Any PK-12 student whose whereabouts is unknown.
*W23	Any PK-12 student who withdraws from school for any reason other than W01 through W22, W24 through W26.
W24	Any PK-12 student who withdraws from school to attend a home education program.
W25	Any student who withdraws from school who is under compulsory attendance age (this may not be used for students six or above).
W26	Any student who leaves to enter the adult program within the district prior to completion of graduation requirements.

*DROPOUT CODES FOR STUDENTS 16 YEARS OF AGE OR OLDER

Appendix B

Primary Exceptionality Codes

CODES	DEFINITION OF CODES:
A	Educable Mentally Handicapped
B	Trainable Mentally Handicapped
C	Physically Impaired
F	Speech Impaired
G	Language Impaired
H	Hearing Impaired
I	Visually Impaired
J	Emotionally Handicapped
K	Specific Learning Disabled
L	Gifted
N	Profoundly Mentally Handicapped
O	Dual-Sensory Impaired
P	Autistic
Q	Severely Emotionally Disturbed
R	Deaf
S	Traumatic Brain Injured
T	Developmentally Delayed
U	Established Conditions
Z	Not Applicable
